AI Usage Declaration Report

Resilio — Smart Inventory. Smooth Queues.

1. Purpose of AI Usage

AI tools were used as supporting tools during the planning, development, debugging, and documentation of Resilio. They helped us understand technical concepts and improve the overall development process.

2. AI Usage Details

Area	How AI Was Used
Project Planning	Understanding requirements and organizing system features.
Coding Assistance	Getting code suggestions and explanations for React, Node.js, Express, and MongoDB.
Debugging	Understanding errors and exploring possible solutions.
Self-Healing	Understanding failure detection, recovery mechanisms, and testing.
UI Design	Improving interface ideas and user experience.
Documentation	Preparing project descriptions and presentation scripts.

3. AI Tool Used

ChatGPT was used for technical guidance, explanations, coding assistance, and documentation support.

4. Team Responsibility

All AI-generated suggestions were reviewed and adapted according to the project's requirements. The project team was responsible for the final implementation, testing, and verification of the system.

5. Declaration

We declare that AI tools were used transparently as supporting aids during the development of Resilio. The final project work, implementation decisions, and testing responsibilities belong to the project team.
